PRINTING Tips

This resource includes 2 versions of the same lapbook in order to include both the U.S. and U.K. spellings in one pdf. Please print only the pages you need.

Help! I want to print the lapbook with U.S. spelling.

Choose your cover from pages 7-12. If you are using the school year version (page 7), please check to make sure it says the correct school year. If not, click in the editable text field to change it before printing. Print lapbook elements from page 14-29.

Help! I want to print the lapbook with U.K. spelling.

Choose your cover from pages 30-35. If you are using the school year version (page 30), please check to make sure it says the correct school year. If not, click in the editable text field to change it before printing. Then print the lapbook elements from page 36-52.

Help! The edges of the pages are getting cut off.

When printing, select "scale to print" or "shrink oversized pages". This will ensure that the pages do not get cut off. If you want to print any pages to cut and paste inside of a composition notebook, select "scale to print" and change it to 85%.

Help! The pages look blurry.

If the images on the pages look blurry, make sure you are opening the file with the latest version of Adobe Reader. You may need to download and install an update in order to see the pages more clearly.

Help! My Mac is set to open PDFs with Preview instead of Adobe Reader.

Macs can default to open PDFs with Preview. To change this setting, single click on any PDF file while holding down the control key. Click on "Get Info" from the menu. Click on the triangle to expand the heading "Open With". Preview will be listed as your default. Use the pull-down menu to select Adobe Reader instead. (If you do not see it as an option, you will need to download it for free from Adobe's website.) Click "Change All", then "Continue" to change this setting for all PDFs.

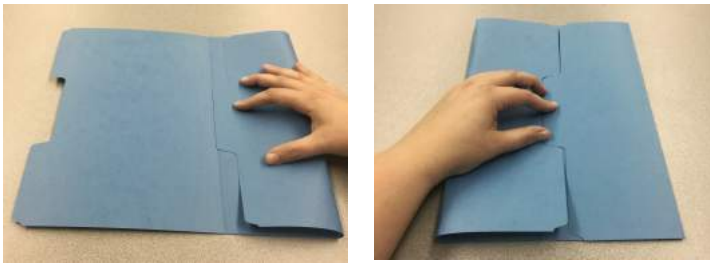

TEACHER TIPS *for the* PERFECT LAPBOOK

1 Prepare Materials

- File folders (1 per student)
- Brass fasteners (4 per student, can also use staples)
- Scissors and glue
- Colored pencils, crayons, or markers
- Construction paper (optional)
- Copies of lapbook pages for each student

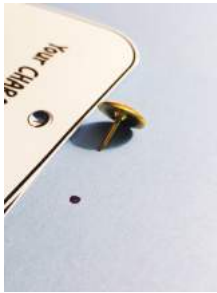

2 Create Your Lapbook Base

- Open the file folder.
- Fold each side in towards the center crease.
- If you are using manila file folders, kids can add construction paper to the center to strengthen (and decorate) it.

2 Add the Details to Your Lapbook

Students should begin working on the inside of the lapbook first.

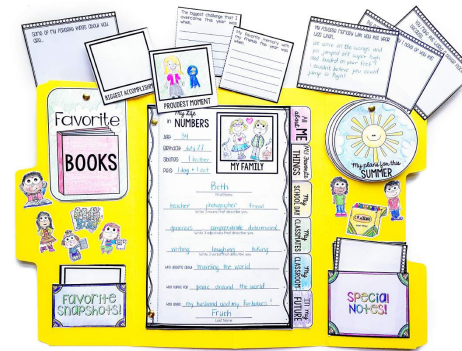

If you can't get the hole puncher to reach, I like to poke a hole with a paperclip or thumb tack before pushing the brad through. I find that it's safer than using something very sharp (like scissors).

Make sure that students glue the pockets on the flaps only so that they can still fit the extra pieces inside.

After students complete the inside of their lapbook, I have them decorate the front flaps and the back. I like to have them use the decorations to cover up the metal brad pieces used to attach the inside pieces.

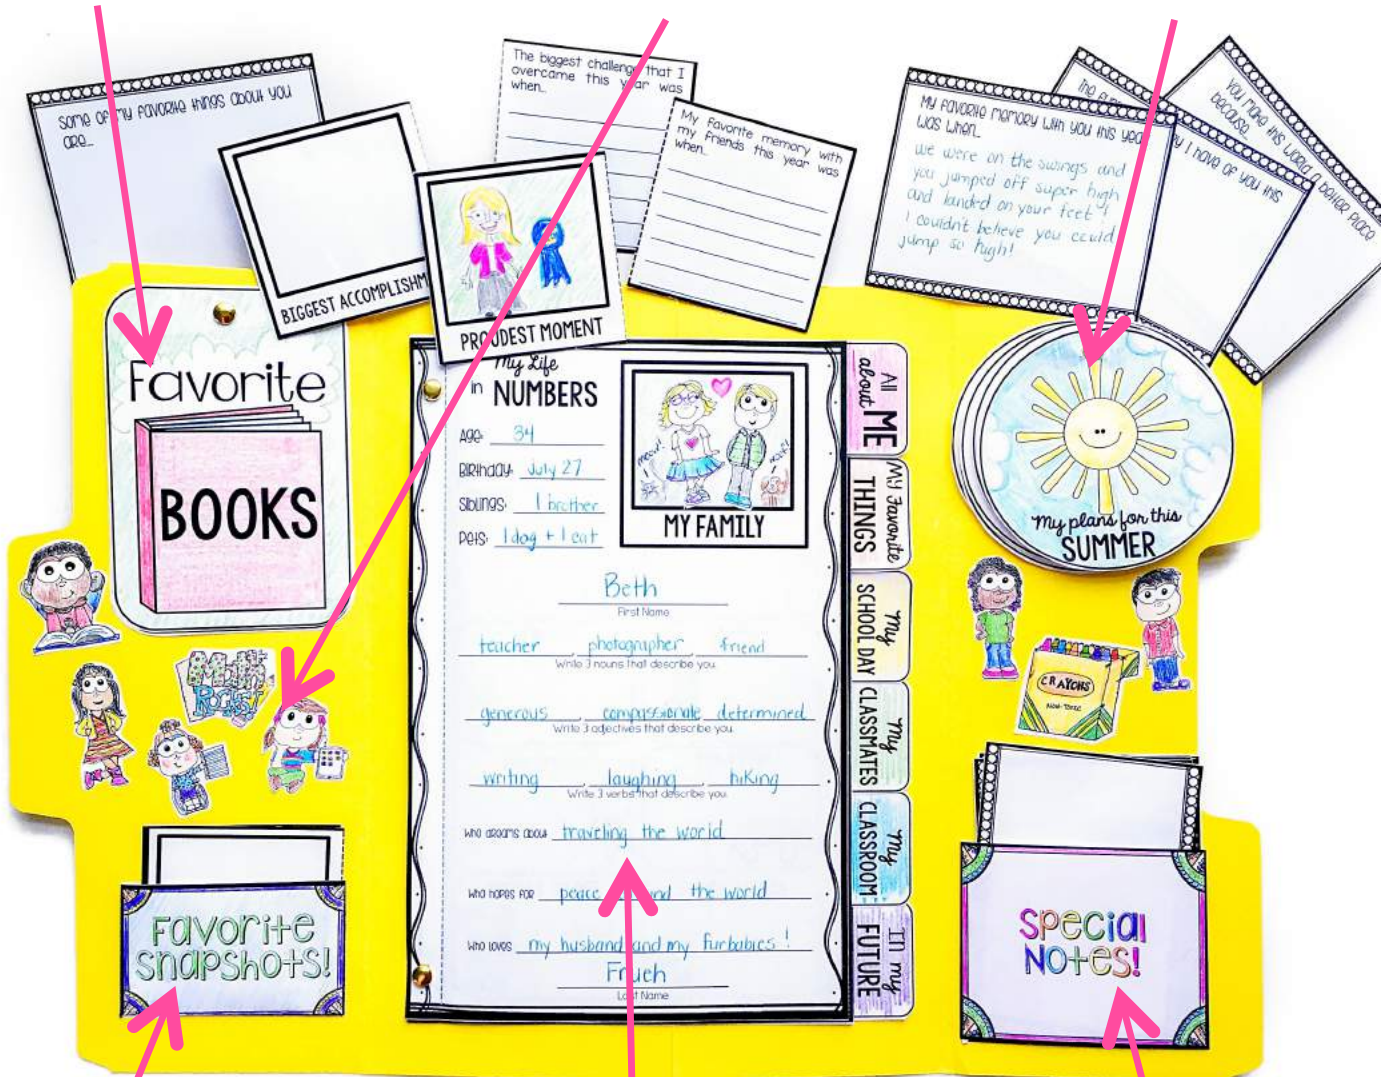

LAPBOOK LAYOUT (INSIDE)

This lapbook works best when you have students complete and attach the inside portions first.

My Favorite Books
