Sweet Shop Problems!

5p 10p 2p 8p 15p 30p

Charlie's bag cost 22p. Which one is his bag? Tick the correct bag.

You are all now working for Year 2's Chocolate Factory and your mission is to create different 60p mixes. How many different combinations can you make? Record the different combinations by saying how many of each sweet you need.

Combinations	5p	10p	2p	8p	15p	30p

Challenge:

Can you pick one of the following amounts and try and make different combinations like you did for 60p?

74p

82p

37p
