

Addition – 2 Digit + 2 Digit (crossing 10)

Column Method

2. We add our tens together next. It looks like $2 + 3$, but we know that this is really $20 + 30$ because these are tens!
Don't forget to add our extra ten underneath!

$$2 + 3 = 5$$

$$5 + 1 = 6$$

$$23 + 35 =$$

1. We add our units (or ones) together first.

$$7 + 5 = 12$$

Our new number has one ten, so we put this under the answer space. Can you see it?

3. Our answer is 62.

Use this method to answer the sums:

1. $16 + 25 =$

	T	U	
	1	6	
+	2	5	

2. $34 + 38 =$

	T	U	
	3	4	
+	3	8	

3. $41 + 29 =$

	T	U	
	4	1	
+	2	9	

4. $46 + 57 =$

	T	U	
	4	6	
+	5	7	

5. $46 + 26 =$

	T	U	
	4	6	
+	2	6	

6. $59 + 14 =$

	T	U	
	5	9	
+	1	4	

7. $27 + 58 =$

	T	U	
	2	7	
+	5	8	

8. $16 + 28 =$

	T	U	
	1	6	
+	2	8	

9. $58 + 25 =$

	T	U	
	5	8	
+	2	5	

10. $28 + 69 =$

	T	U	
	2	8	
+	6	9
