

## Addition – 2 Digit + 2 Digit (crossing 10)

### Column Method

**2.** We add our tens together next. It looks like  $9 + 2$ , but we know that this is really  $90 + 20$  because these are tens! **Don't forget to add our extra ten underneath!**

$$9 + 2 = 11$$

$$11 + 1 = 12$$

**Now we have 12 tens but we have no other columns to add so we put this in our answer space.**

$$93 + 28 =$$

**1.** We add our units (or ones) together first.

$$3 + 8 = 11$$

Our new number has one ten, so we put this under the answer space. Can you see it?

**3.** Our answer is 121.

Use this method to answer the sums:

1.  $74 + 35 =$

	T	U		
	7	4		
+	3	5		
	<hr/>			
	<hr/>			

2.  $62 + 45 =$

	T	U		
	6	2		
+	4	5		
	<hr/>			
	<hr/>			

2.  $48 + 64 =$

	T	U		
	4	8		
+	6	4		
	<hr/>			
	<hr/>			

4.  $66 + 57 =$

	T	U		
	6	6		
+	5	7		
	<hr/>			
	<hr/>			

5.  $86 + 47 =$

	T	U	
	8	6	
+	4	7	
_____			
_____			

6.  $59 + 64 =$

		T	U
		5	9
+		6	4
_____			
_____			

7.  $34 + 96 =$

		T	U
		3	4
+		9	6
_____			
_____			

8.  $16 + 98 =$

		T	U
		1	6
+		9	8
_____			
_____			

9.  $38 + 75 =$

		T	U
		3	8
+		7	5
_____			
_____			

10.  $79 + 41 =$

		T	U
		7	9
+		4	1
_____			
_____
