

## Subtraction – 2 Digit - 2 Digit (not crossing 10)

### Column Method

2. We subtract our tens next. It looks like  $5 - 3$ , but we know that this is really  $50 - 30$  because these are tens!

$$50 - 30 = 20$$

$$58 - 32 =$$

	T	U
	5	8
-	3	2
	2	6

1. We subtract our units (or ones) first. We have to start with the number at the top.

$$8 - 2 = 6$$

3. Our answer is 26.

Use this method to answer the sums:

1.  $67 - 23 =$

	T	U	
	6	7	
	-	2	3
	—		
	—		

2.  $44 - 32 =$

	T	U	
	4	4	
	-	3	2
	—		
	—		

3.  $48 - 27 =$

	T	U	
	4	8	
	-	2	7
	—		
	—		

4.  $84 - 51 =$

	T	U	
	8	4	
	-	5	1
	—		
	—		

5.  $87 - 33 =$

	T	U	
	8	7	
-	3	3	
_____			
_____			

6.  $58 - 22 =$

	T	U	
	5	8	
-	2	2	
_____			
_____			

7.  $76 - 55 =$

	T	U	
	7	6	
-	5	5	
_____			
_____			

8.  $69 - 35 =$

	T	U	
	6	9	
-	3	5	
_____			
_____			

9.  $76 - 23 =$

	T	U	
	7	6	
-	2	3	
_____			
_____			

10.  $84 - 71 =$

	T	U	
	8	4	
-	7	1	
_____			
_____
